

MOHD SUHAIL IDRISI

Email: suhailult123@gmail.com | ph:8639213814 | GitHub: <https://github.com/suhailult777> |
LinkedIn: <https://www.linkedin.com/in/suhailult123/> | Portfolio: <https://suhailultlinks.vercel.app/>

Skills

Languages: JavaScript, TypeScript, Python, Java, HTML, CSS

ORMS and Databases: Drizzle ORM, Mongoose ORM, NeonDB, MongoDB

Technologies & Tools: React.js, MERN Stack, AI/ML integration, Frontend/UI development

Work Experience

Mist-Technical Club/HYD:

- Lead the team and Spearheaded the design and development of a [Java-based Employee Management System](#) using Swing for an intuitive UI and JDBC for robust MySQL connectivity, streamlining employee data management and reducing manual administrative tasks; Technologies: Java, Swing, JDBC, MySQL, Visual Studio Code, MySQL-connector-java, rs2xml, jcalendar

Project Work

- [AI-Multi-Code-Agent](#): The AI-Multi-Code-Agent project is an autonomous coding and planning agent designed to go beyond simple code generation. Leveraging advanced AI and tool-calling capabilities, it can **create project folders and files, generates and write code by itself and test the code automatically**. With its interactive interface, developers can offload repetitive coding tasks, accelerate prototyping, and experiment with AI-powered software development like never before.
- [AI-VSCode Extension](#): The Jarvis VS Code Extension integrates Ollama's AI chat capabilities directly into Visual Studio Code, offering developers an interactive AI assistant within their coding environment. This extension provides a seamless chat interface with streaming responses, enhancing productivity and facilitating real-time problem-solving
- [MERN-Blog-Website](#): The Full stack MERN Blogging Website seamlessly integrates a modern blog editor and Google authentication into a dynamic platform, enabling users to create, manage, and interact with content efficiently. Features include dynamic URLs for individual blogs, a comprehensive search function, user profiles with social links, and a personalized dashboard for managing posts.
- [Java-Employee Management System](#): The Employee Management System is a Java-based application designed to efficiently manage employee records within an organization. Utilizing Java Swing for the graphical user interface and JDBC for database connectivity, this system offers functionalities such as viewing, searching, printing, and updating employee information

Education

MAHAVEER INSTITUTE OF SCIENCE AND TECHNOLOGY:

CGPA:7.1/10

Currently pursuing(Sept 2022 - Sept 2026) B.tech. in Computer Science and Engineering Relevant Coursework: Object Oriented Programming, Databases, Discrete Maths, Data Structures and Algorithms, Operating Systems, Computer Networks, Machine Learning, Data Mining, Advance Data Structures and Algorithms, Information Retrieval, Image Processing

Awards and Certificates

- Done Certification from [DATAFLAIR](#) for Core Java
- Done Certification from [Nxt Wave](#) for AI/ML
